

MEET YOUR TEACHER!

SABRINA LIM

Before you start class, we thought you should know more about who will be guiding you along.
Meet Ms. Sabrina Lim.
She loves to help students grow and thrive.

Ms. Lim has been teaching since 2010. She taught GP/English for 4 years in Anglo-Chinese Junior College, before leaving to pursue a Masters in Education. She worked with NGOs to develop social justice-oriented curricula to inspire students to enable social change. She joined SOT in 2015.

Students enjoy how Ms. Lim makes the classroom a safe yet dynamic space for questions and thoughts to freely flow. She challenges students to ask hard questions and allows them the freedom to ask and explore.

Ms. Lim sees life as a journey of becoming. She loves encouraging youths to keep seeking answers to life's big questions and is also passionate about empowering women.

If you have any questions about what you will be learning, contact Ms Lim at sabrina@thethoughtcollective.com.sg

ON WHY SHE HAS CHOSEN TO TEACH:

"Everyone has something to offer. Every student has something to bring to the table that we can all learn from. Our society tells us that some of us are smarter than others or worth more than others. I want to break that, to help students see value in what they know and in themselves. When they see their intrinsic value, they will become fearless learners."

ON WHAT SHE HOPES TO HELP STUDENTS SEE ABOUT SINGAPORE:

"I hope my students will see the people of Singapore with kind eyes. When they think about Singapore, I want them to see hope. Singapore is my home, my parents' home and my future children's home. I would sacrifice much for it. It is where my past lies, where my present is, and where I build my future. Many say that it is not possible to be prosperous and kind at the same time because it is a zero sum world. But I think if there's a place where that can happen, it is Singapore. Because we have to be; and we can be."

ON MAKING LEARNING AND LIFE MEANINGFUL FOR HER STUDENTS:

"Caring for plants teaches me about caring for students. To really care well for a plant, we must first know what the plant needs. Some are much hardier than others, while some need more care. I want to reach out to people in a way that makes sense to them. We are all different and how we receive love and help is different too. I want to help everyone grow tall in life!"
